

# CHIEF INFORMATION TECHNOLOGIST

Job Code	Pay Grade
14686	SM4b

## Nature of Work

This is highly responsible technical and professional work that is strategic and supervisory in nature. Assignments include the most advanced expert analytical, technical, and administrative work in information technology (IT) serving county affiliates, departments, and organizations in support of mission critical operations. The incumbent performs as the highest-level subject matter expert managing in assigned fields and takes major responsibility for personnel, work products, standards, policies, and information technology assets. An incumbent is expected to identify and resolve the most complex work problems of a nature that supports or complements organizational efforts as well as lower level IT specialists and provides guidance to achieve and maintain superior department level customer service. Work routinely requires leadership, initiative, creativity, and original thinking. Assignments are generally performed independently or under the general guidance of senior management with extensive latitude for individual and team initiative, judgment, and discretion. The position reports to a senior manager or designee.

## Minimum Qualifications Requirements

- Candidate must possess designated certification or clearly be recognized as an expert in the field with prior leadership or supervisor responsibility in the position's assigned subject matter areas and disciplines including both general knowledge and advanced expert proficiency in up to 3 or more of the following areas: database administration; network management; desktop management; server management; application design; application development; enterprise architecture; quality assurance; incident management; security management; financial management; service management; production application services; asset management; storage area network; middleware management; project/portfolio management; document management; or other IT subject matter areas of responsibility. In addition, a candidate must possess a combination of 10 years' experience, formal technical training, and leadership experience in directly related and highly advanced professional experience in information technology, management information services, computer science, engineering, or an occupation evidencing competency in computer skills in a broad range of diverse business processes including supervision and team leadership with a focus on customer service and outcomes; or
- Associate's degree in information technology, computer science, computer technology, or related field plus 8 years of directly related experience as described above; or
- Bachelor's degree and 6 years' experience as described above; or
- Master's degree and 4 years' experience as described above; or
- An equivalent combination of related education, training, and/or experience

## Appointing Authority May Also Require

- Florida Driver's License or Florida Commercial Driver's License and endorsement, if any
- Assignment to work a variety of work schedules including compulsory work periods in special, emergency, and/or disaster situations
- Incumbent may be required to demonstrate or be officially certified in one or more specific information technology functions or disciplines.
- Other highly desirable knowledge, skills, abilities and credentials relevant to the position.

## Illustrative Tasks (These are examples and are not all inclusive.)

- Applies expert-level technical knowledge, quality, dependability, judgment, communications and initiative, with demonstrated expert-level proficiency in order to meet design specifications of computer systems, programs and operating systems.
- Provides leadership that fosters commitment, team spirit, pride and trust through coaching, mentoring, recognizing, and guiding employees to achieve results through others.
- Uses interpersonal skills to influence and inspire others to follow, facilitates and fosters open communication and cooperation within the organization and with customer groups to build an effective team environment.
- Acts as a catalyst for organizational change that fosters a quality of service essential to high performance in order to motivate and influence others to translate vision into actions and meaningful contributions that drive performance to higher levels of effectiveness and productivity.
- Manages and performs personal daily activities and multiple complex projects under the discipline of defined departmental business planning and processes.
- Prepares project plans, schedules, and outlines requirements, tasks, work assignments, resources, and critical milestones, with a demonstrated ability to prioritize work for both self and others with effective follow-up and assignment completion.
