Project Overview

The Cross Bayou Canal (CBC) Flood Control Project is focused on extending the life of the canal and will address dredging, debris and exotic vegetation removal, canal bank stabilization and acquisition of property rights. This project is unique in that it requires immediate implementation to remove exotic vegetation in order to gain access to the canal in several areas. As the design and permitting for dredging, removal of mangroves in the conveyance way, bank stabilization and acquisition of property rights proceeds Implementation Phase I, exotic vegetation removal, is being implemented.

- Design, Permitting, Development of Construction Documents Property Rights Acquisition
 - Phase I Completed
 - Survey, data gathering and model refinement
 - Phase II and III
 - Design, permitting and development of construction documents, and documents for property rights acquisition
- Implementation - Construction
 - Phase I
 - Removal of exotic vegetation (on-going)
 - Phase II
 - Acquisition of property rights
