The County Administrator or his or her designee shall be the final arbiter in resolving the issue before it becomes a legal matter. ## SECTION B– SPECIAL CONDITIONS

Proposals are to be submitted in a sealed envelope. The face of the envelope shall indicate the RFP number, name, and address of the firm, and title of the proposal.

Proposals are to be submitted to Pinellas County Purchasing Department, 400 S. Ft. Harrison Avenue, Annex Bldg, 6th Floor, Clearwater, FL 33756 by the date and time indicated on the cover sheet.

Proposals shall be submitted in one (1) original paper document and EIGHT (8) electronic media copies CDs/DVDs or Travel Drives in PDF format. The preferred method is PDF conversion from the Proposer's source files (to minimize file size and maximize quality and accessibility) rather than scanning so that the County can open, print, read and save the pdf file you have created. To ensure consistency, the electronic copy should be ONE file document and in the same order as the paper original. If this is not possible, the electronic copy files should be in the same order as the paper copy, with a directory listing of the files.

Please note the evaluation committee will use the electronic media copies to review your submittal. Failure to include all information in the electronic media copies may have an impact on your evaluation scores.

**Instructions for Providing Files in PDF Format to Pinellas County Government**

- A. Why does Pinellas County Government want all the documents as PDF files?**  
**Answer-** It's much more efficient to go paperless, and PDF is a universal file format that fits perfectly into government workflow processes.
- B. How do I convert my files to PDF format?**  
**Answer-** If you have a program such as Adobe Acrobat, creating a PDF of any file is a simple print function. Rather than printing to a traditional printer, the file converts to a PDF format copy of your original. Any program (such as Word, PowerPoint, Excel, etc.) can be converted this way by simply selecting the print command and choosing PDF as the printer.
- C. Should I scan everything and save as PDF?**  
**Answer-** Not unless you are scanning with OCR (optical character recognition). Scanning will create unnecessarily large files because a scan is just a picture of a page rather than actual page text. Furthermore, the result of scanning is that your pages will not look nearly as "clean" or professional as simply using the print to PDF method from the program from which the file originates. Additionally, since scan pages are pictures of text, not really text, they may not be considered accessible\* under Federal ADA guidelines (\*unless the scans are OCR.)
- D. My document is a compilation of multiple sources. Should I send multiple PDF files?**  
**Answer-** You may, however merging pages/files is a very simple process within PDF.
- E. How do I get my PDF files to Pinellas County Government?**  
**Answer-** They may be provided on any medium that is compatible with a standard PC. A CD is generally the simplest method. Please label the CD with a listing of contents. Provide the files to whoever your Pinellas County contact is for the project you are working on. For PDF technical support, contact [webadmin@pinellascounty.org](mailto:webadmin@pinellascounty.org).

**Tips & Best-Practice Recommendations**

File names should clearly identify the file. Avoid cryptic or extremely long file names.  
 File names should not include spaces or special characters (stick to letters, numbers and dashes.)  
 For example **MyCompany-bid-3000-oct-2012.pdf**

Check the PDF files to make sure they are functional before you send them.

If the file is large and has a table of contents, adding links to the table of contents makes your files much more user friendly.

To maximize the usefulness and audit-ability of your files, it is recommended to add some identifier (AKA metadata) information to the PDF files. To do this is simple. After you have converted your file to PDF, use Acrobat, select File-Properties, and add the name of the author, subject, and any additional info you like to make the source of the document clearly traceable.

<b>SECTION E –SCOPE OF WORK</b>
---------------------------------

**Proposal Title: Professional Engineering Consulting Services for Water & Sewer Optimization Study**  
**Proposal Number: 134-0166-CN(RM)**

**A. OBJECTIVE:**

The Pinellas County (County) Department of Environment and Infrastructure (DEI) Water and Sewer Division is seeking proposals from interested and qualified consulting engineering firms that are familiar with the “Envision Process” (an in-depth guidance and rating system used to assess and improve the sustainability metrics of all types and sizes of infrastructure projects). Using the “Envision Process” the consultant selected will initially perform a comprehensive Optimization Study (OS) of the assets associated with or affecting the South Cross Bayou Water Reclamation Facility and potentially expand the OS to include other DEI water reclamation facilities, pump stations and/or other facilities associated with DEI. The overall objective of this proposal is to identify, but is not limited to, energy reduction, process optimization and technology opportunities that are measureable and will improve the long term economic, environmental and social sustainability of the facility. Any and all projects that result from the OS must be registered and verified. Successful completion of each project will require guaranteeing that it has met the projected Envision Process requirements. Information about the Envision Process can be found by going to the Institute for Sustainable Infrastructure (ISI) website located at [www.sustainableinfrastructure.org](http://www.sustainableinfrastructure.org)

**B. BACKGROUND:****About the Institute for Sustainable Infrastructure (ISI):**

The Institute for Sustainable Infrastructure (ISI) is a 501 (c) (3) not for profit organization, structured to develop and maintain a sustainability rating system for civil infrastructure in the United States. That system, called Envision™, is collaboration between ISI in Washington, D.C., and the Zofnass Program for Sustainable Infrastructure at the Graduate School of Design at Harvard University, Cambridge, Massachusetts. ISI was founded by the American Council of Engineering Companies (ACEC), the American Public Works Association (APWA), and the American Society of Civil Engineers (ASCE)

**DEI’s Water and Sewer Division:**

DEI’s Water and Sewer Division is responsible for operating and maintaining the water, sewer and reclaimed water systems within the designated service areas under the jurisdiction of the Pinellas County Florida Board of County Commissioners. Over three billion dollars in assets are included in the water and sewer systems. The Division’s activities range from maintaining the pipe networks throughout the service areas including service connections (meters and backflows) by the Maintenance Section, to treating the wastewater and pumping potable water and reclaimed water by the Plant Operations Section, and finally, to collecting and testing samples, monitoring compliance to County Ordinances, State Statutes, and Federal Regulations by the Monitoring and Laboratory Section

**Water System:**

The County’s retail water service area serves a population of over 450,000 residents. The County also serves four cities as wholesale customers including Clearwater, Tarpon Springs, Safety Harbor and Pinellas Park. These cities purchase water from the County in bulk at a reduced rate and maintain their own distribution systems and network of pipes. The Town of Belleair and City of Oldsmar have emergency connections to the County to occasionally supplement their water supply.

The water system consists of approximately 2,000 miles of water mains from 2 inches to 60 inches in diameter. It includes almost 112,000 service connections with appropriately sized meters and more than 41,000 backflow prevention assemblies. Approximately 50 MGD (millions of gallons per day) of water is supplied to the County’s Keller Water Facility from the regional water supplier (Tampa Bay Water). The Keller Water Facility is at the ‘head’ of the County’s water distribution system, where it’s chemically trimmed and pumped to customers using five stations strategically located throughout the County. Each of the pump stations has storage capacity ranging from 3 to 20

<b>SECTION E –SCOPE OF WORK</b>
---------------------------------

million gallons with a total system capacity of 45 million gallons. The Keller Water Facility is located at 3655 Keller Circle, Tarpon Springs, FL 34688.

**Sewer System:**

The County's retail sewer service area consists of more than 80,000 customers with a population of approximately 300,000 residents. The North County wastewater collection system flows to the WEDWRF and services the unincorporated areas of Palm Harbor and East Lake. The South County retail wastewater collection system flows to the SCBWRF and services most of the unincorporated area south of Ulmerton Road, along with the cities of Kenneth City, Seminole, Belleair Bluffs and the Town of Belleair. In addition, the South County retail sewer service area serves the beach cities from Belleair Beach south to Madeira Beach, with the exception of the cities of Indian Rocks Beach, Redington Shores, and North Redington Beach. These three cities are wholesale sewer customers along with the City of Pinellas Park. All four of these municipalities maintain their own wastewater collection systems and transmit their wastewater in bulk to the SCBWRF at a reduced wholesale rate.

The sanitary sewer system consists of more than 1,100 miles of gravity sewer pipes ranging in size from 6 inches to 42 inches in diameter and pressurized force main pipes ranging in size from 4 inches to 42 inches in diameter. In addition, there are over 350 miles of reclaimed water mains ranging in size from 4 inches to 54 inches in diameter. Wastewater is collected in the pipe network and transmitted by gravity or force main via 297 pump stations to one of the two County Water Reclamation Facilities (WRF) for treatment.

The South Cross Bayou WRF (SCBWRF) is permitted to receive up to 33 MGD and typically receives average daily flows of 20 to 25 MGD with peaks during extreme wet weather events. SCBWRF is a 'Modified Lutzack Ettinger' activated sludge process with secondary clarifiers and tertiary denitrification filters. The SCBWRF is located at 7401 54th Ave N, St. Petersburg, FL 33709.

The Wm. E. Dunn WRF (WEDWRF) is permitted to receive up to 9 MGD and typically receives flows around 6.5 MGD. In addition, two of the County's sanitary sewer service areas, Bear Creek and East Lake Woodlands, flow to treatment facilities maintained by the cities of St. Petersburg and Oldsmar, respectively. Biosolids generated by the County's WRFs are combined and pelletized at the SCBWRF pelletizer and sold to commercial fertilizer blenders for beneficial reuse as a Class AA agricultural fertilizer. The WEDWRF is located at 4111 Dunn Dr., Palm Harbor, Florida 34683.

**Reclaimed Water System:**

Reclaimed water is distributed to approximately 11,600 customers, divided into two service areas. The North County reclaimed water is provided by the WEDWRF and supplemented with reclaimed water purchased under a wholesale agreement from the cities of Clearwater and Oldsmar. Reclaimed water is provided in the North County to customers in the unincorporated areas of Palm Harbor and the Landsbrook area of East Lake. In the South County, reclaimed water is provided by the SCBWRF to several unincorporated areas in the proximate area of the facility, as well as several unincorporated areas and designated areas in the City of Seminole along the transmission main to the beach communities. The beach communities served in the South County retail reclaimed water area include the Sand Key area in the City of Clearwater, all the beach cities to the south down to Treasure Island, and the unincorporated area of Tierra Verde at the southern tip of the County. The County also provides wholesale reclaimed water at a bulk rate to the cities of St. Pete Beach, South Pasadena, Pinellas Park, and the Town of Belleair.

Wastewater treated at the facilities is sent to the reclaimed water system for distribution to customers for irrigation or discharged to surface water when in excess. The WEDWRF has a 60 million gallon storage pond and a pumping facility to pump 100% of the reclaimed water to customers and also has contracts with Clearwater and Oldsmar to purchase 3 MGD and 0.75 MGD, respectively, to augment the supply. The SCBWRF has 18 million gallons of reclaimed water storage and a pump station to send approximately 50 to 75% of the reclaimed water to customers. The remaining reclaimed water is disposed of through a permitted surface water discharge. In addition to the reclaimed water pumping and storage facilities at each water reclamation facility, there is a North County pumping station with a 5 million gallon storage tank (the Clearwater-Oldsmar Interconnect Station) and a South County pumping station with a 5 million gallon storage tank (McKay Creek). The County also has a reclaimed water pump station in Tierra Verde and maintains the reclaimed water pump station in St. Pete Beach.
