Instructions for Providing Files in PDF Format to Pinellas County Government**Why does Pinellas County Government want all the documents as PDF files?**

Answer- It's much more efficient to go paperless, and PDF is a universal file format that fits perfectly into government workflow processes.

How do I convert my files to PDF format?

SECTION B – SPECIAL CONDITIONS

Answer- If you have a program such as Adobe Acrobat, creating a PDF of any file is a simple print function. Rather than printing to a traditional printer, the file converts to a PDF format copy of your original. Any program (such as Word, PowerPoint, Excel, etc.) can be converted this way by simply selecting the print command and choosing PDF as the printer.

Should I scan everything and save as PDF?

Answer- Not unless you are scanning with OCR (optical character recognition). Scanning will create unnecessarily large files because a scan is just a picture of a page rather than actual page text. Furthermore, the result of scanning is that your pages will not look nearly as “clean” or professional as simply using the print to PDF method from the program from which the file originates. Additionally, since scan pages are pictures of text, not really text, they may not be considered accessible* under Federal ADA guidelines (*unless the scans are OCR).

SECTION C – LIMITATION ON LIABILITY, INDEMNIFICATION, AND INSURANCE REQUIREMENTS

1. **LIMITATIONS ON LIABILITY.** By submitting a Proposal, the Proposer acknowledges and agrees that the services will be provided without any limitation on Proposer's liability. 2. **INDEMNIFICATION.** By submitting a Proposal, the Proposer acknowledges and agrees to be bound by and subject to the County's indemnification provisions as set out in the Services Agreement. County reserves the right to require a certified copy of the entire insurance policy, including endorsement(s), at any time during the RFP and/or contract period.

The County shall be under no obligation to purchase such insurance, nor shall it be responsible for the coverages purchased or the insurance company or companies used. The decision of the County to purchase such insurance shall in no way be construed to be a waiver of any of its rights under the Agreement.

SECTION E – SCOPE OF WORK

Proposal Title: Water System Master Plan Update – Professional Engineering Services**Proposal Number: 178-0501-NC (SS)****A. OBJECTIVE:**

Pinellas County Utilities seeks to retain the services of the most qualified professional engineering consultant to provide an update to the Pinellas County Water System Master Plan. The purpose of the Master Plan Update is to evaluate the existing water system including but not limited to the source waters, water treatment, pump stations and the distribution system. The short and long term recommendations from this Master Plan will be used as a guide for implementing improvements that will help the County continue to provide safe, reliable, and sustainable drinking water that satisfies current and future regulatory requirements.

B. BACKGROUND:

Pinellas County, (“the County”), is located on the west coast of Florida and boasts the most densely populated county in Florida. With over 675,000 water customers including residential, commercial, industrial, institutional and wholesale users, the County delivers an average of 50 million gallons of potable water daily through approximately 112,960 water service connections. The County purchases potable and raw water from Tampa Bay Water (TBW) the regional water supplier. Other member governments that also purchase water from TBW include Hillsborough County, Pasco County, New Port Richey, St. Petersburg and Tampa. The source water from TBW includes a blend of groundwater, several surface waters and desalinization. The County treats the aerated raw wellfield water with 12.5% Sodium Hypochlorite for primary disinfection then adds 19% Ammonium Hydroxide to form monochloramines for secondary disinfection at the Keller Water Treatment Facility. The Keller water is then blended with the TBW regional water at the Regional Water Treatment Facility where the County provides additional water treatment to the final blend before the water is delivered to customers. Additional treatment includes the addition of 12.5% Sodium Hypochlorite to recombine the available free ammonia, additional 19% Ammonium Hydroxide can be added if needed to bring the monochloramine residual to the desired level, pH stabilization using sodium hydroxide, the addition of polyphosphate as a corrosion inhibitor, and the addition of fluoride for dental health.

The County’s potable water system includes the S. K. Keller Water Treatment Facility, the S.K. Keller Regional Treatment Facility, the North Booster Pump Station, the Logan Booster Pump Station, the Capri Isle and Gulf Beach Pump Stations, and over 1,700 miles of piping and associated valves, which all serve to provide potable water to customers. In addition, Pinellas County provides potable water to wholesale customers which include Clearwater, Pinellas Park and Safety Harbor and the Town of Belleair. Additional interconnections for emergency purposes include the cities of Tarpon Springs, Oldsmar, Dunedin, and the City of St. Petersburg also a member of TBW.

The previous Water Master Plan was completed in 1997 by Hartman & Associates. A more recent report includes Upgrades and Improvements to the Water Distribution System, completed in 2010 by Jones Edmunds & Associates.

C. SCOPE OF WORK:

The project services shall include the following:

1. Update the existing hydraulic model in Bentley’s modeling software - WaterGems.
2. Review model platform and evaluate if WaterGems is the best option for modeling needs.
3. Address hydraulics with existing and future conditions including population growth.
4. Following acceptance of the hydraulic model update, address linear flow analysis that was implemented in 2016.
