Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability, or family status. If you need special accommodations under the Americans with Disabilities Act, or require translation services (free of charge), please call (727) 464-4062 (VOICE/TDD) at least seven days before the meeting.

Project Overview | Project ID# 003130A

Pinellas County is hosting a neighborhood meeting on Tuesday, January 8, 2019 to provide information regarding the planned stormwater facility improvements at the County-owned property northeast of the intersection of 43rd Street North and Lake Boulevard, outlined in orange on the map below. County and engineering consultant representatives will be available to review the proposed improvements and answer questions. The project is intended to improve water quality by expanding the treatment capability of the system and stormwater runoff that currently flows directly into Roosevelt Creek into the facility for treatment prior to making its way into Roosevelt Creek and ultimately into Tampa Bay.

Public Involvement

The intent of the neighborhood meeting is to make you aware of the planned water quality related improvements to the existing County stormwater facility and obtain any feedback you may have. The current engineering plans are available on our website at: <http://www.pinellascounty.org/environment/watershed/watershed-roosevelt-creek.htm>. In addition to reviewing the information available on our website, we encourage your participation in the meeting, where you may submit a comment card if desired. If you cannot attend the meeting, please feel free to contact us via the email address or phone number listed to the left, referencing the project name and ID number listed above.

Project Schedule

The design phase of the project is currently nearing 60% completion. The project is programmed in the Pinellas County Capital Improvement Program and is currently funded for construction beginning in Summer 2019. These improvements are being paid for by the Penny for Pinellas program with partial funding through a Cooperative Funding Initiative (CFI) Grant Agreement administered by the Southwest Florida Water Management District (SWFWMD).
