

Quality Assurance Analyst

Category: Exempt
Pay Grade: E20
Job Code: 14645

To perform this job successfully, an individual must be able to perform the essential job functions satisfactorily. Reasonable accommodations may be made to enable individuals with disabilities to perform the primary job functions herein described. Since every duty associated with this position may not be described herein, employees may be required to perform duties not specifically spelled out in the job description, but which may be reasonably considered to be incidental in the performing of their duties just as though they were actually written out in this job description.

JOB SUMMARY

Performs professional work tactical in nature which includes advanced analytical and technical assignments that involve 'hands-on' end-to-end testing for a range of new and ongoing projects across multiple technology platforms and within an adopted framework methodology. An incumbent will be responsible for advising and guiding lower level staff on the use of testing tools, technologies and approaches to ensure the development and delivery of effective technical testing solutions to meet business objectives and will work in close consultation and collaboration with key project team members and business stakeholders (such as, developers, project managers, business analysts, business unit owners, etc.) and will be required to both gather and translate business requirements into testing solutions, as well as manage their delivery to agreed schedules and budget. The incumbent is required to identify and resolve major work problems of a nature that lower level employees are unable to solve or overcome. Work requires creative and original thinking and is performed under the general direction of more senior professionals with significant latitude for individual and team initiative, judgment and discretion in working with customers to determine hardware, software, maintain functioning operations, as well as to achieve business objectives.

ESSENTIAL JOB FUNCTIONS (examples, not all inclusive)

- Demonstrates advanced level proficiency in two of the departmental section disciplines: Database Administration, Network Management, Desktop Management, Server Management, Application Design, Application Development, Enterprise Architecture, Security Management, Quality Assurance, Incident Management, Financial Management, Project Management, Document Management, Service Management, Asset Management, Production Application Services, Storage Area Network, Middleware Management;
